METHODE 1
METHOD 1

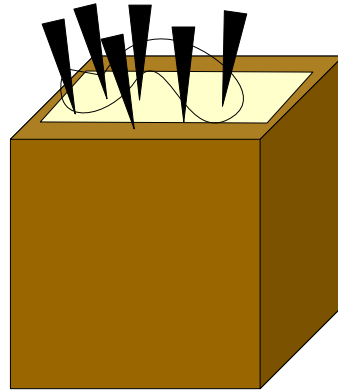

Clous
Nails

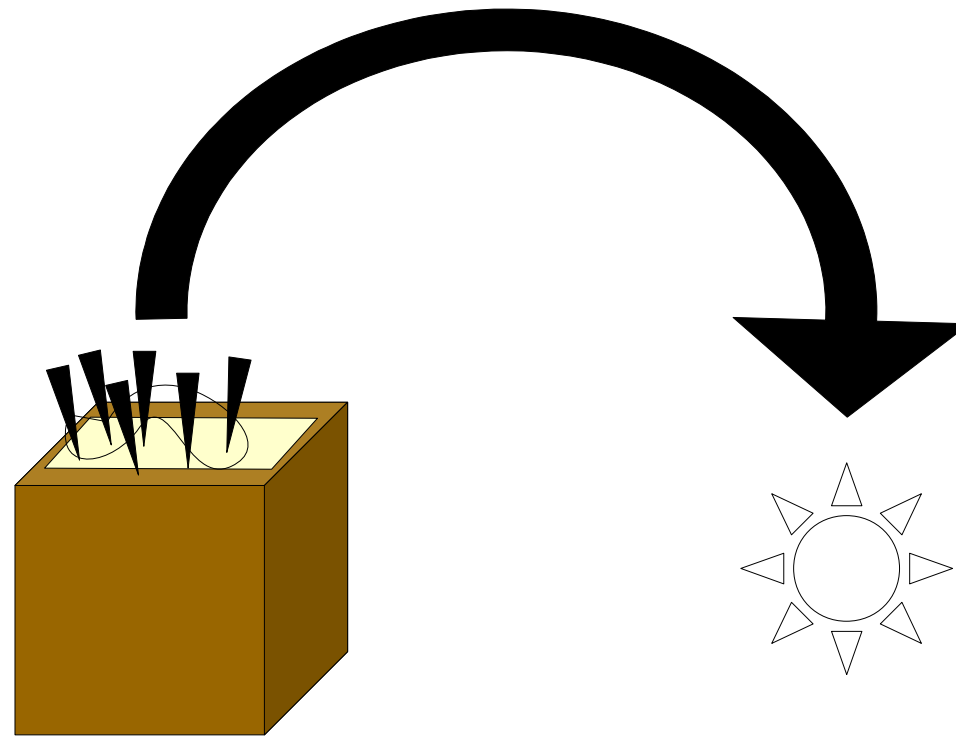

Moule
Mould

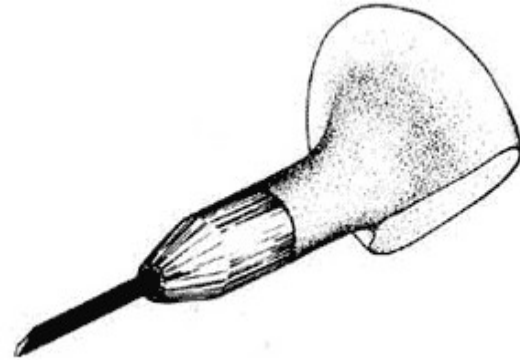

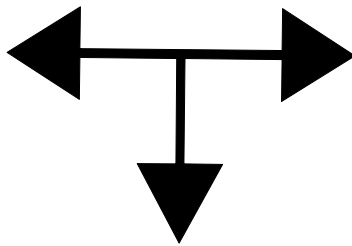

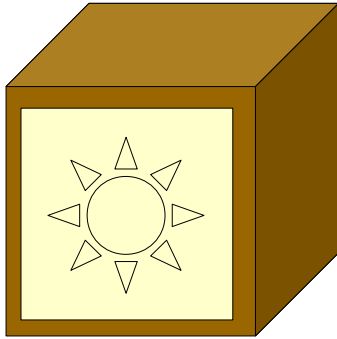

Fil métallique
Wire

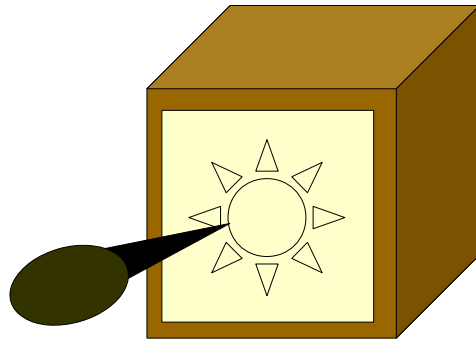

Le fil métallique est modelé autour des clous pour former le filigrane selon le motif dessiné au début.
The wire is shaped around the nails to form the watermark according to the pattern drawn at first.

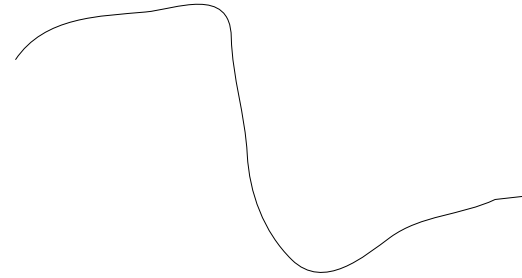

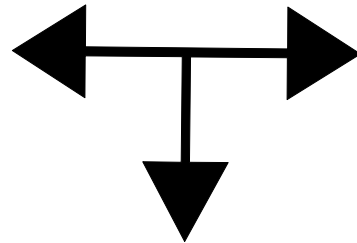

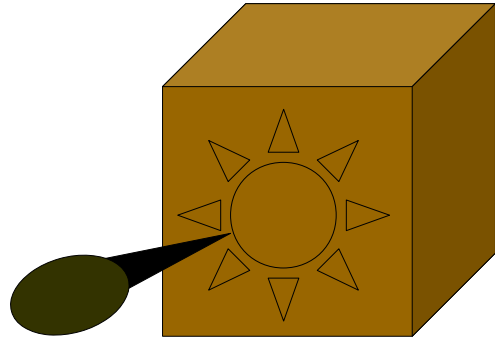

METHODE 2
METHOD 2

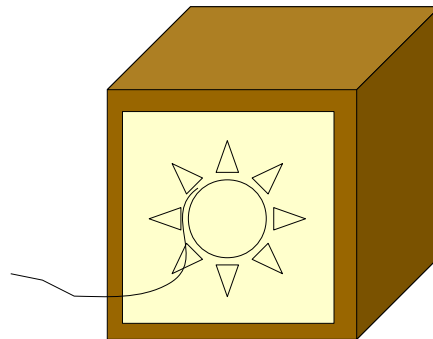

Burin
Chisel

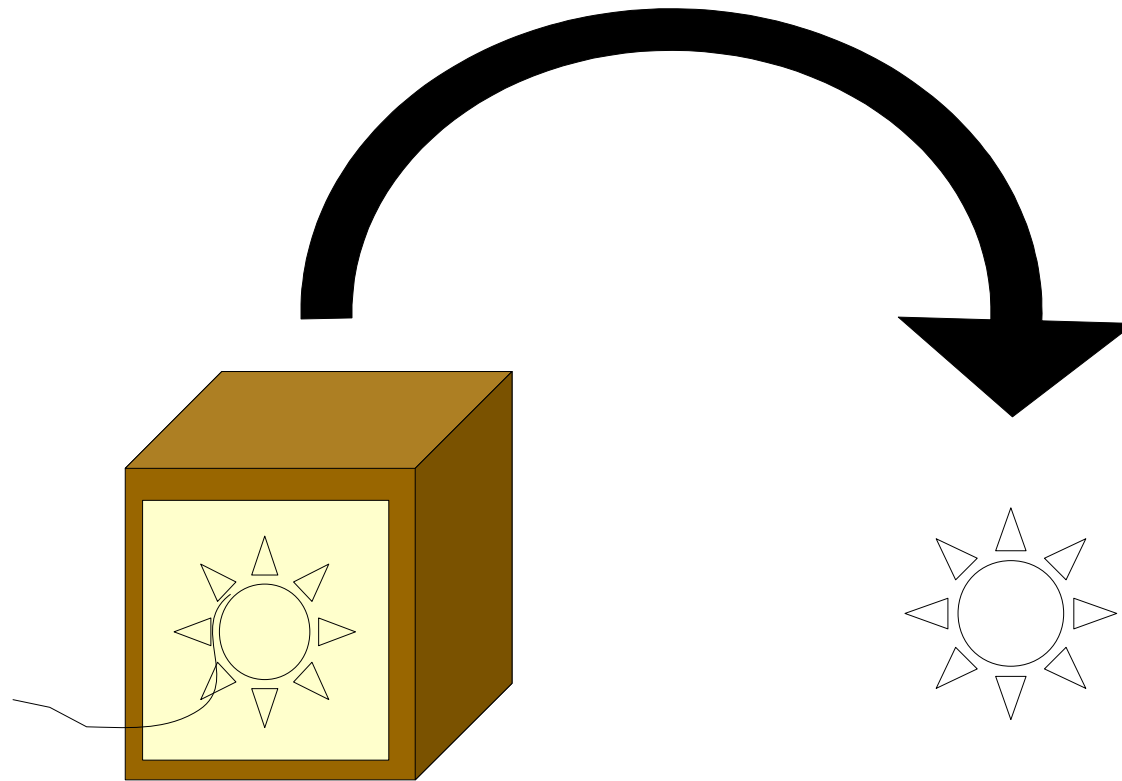

Moule
Mould

Fil métallique
Wire

Le fil métallique est modelé dans l'incision faite avec le burin, pour former le filigrane selon le motif dessiné au début.

The wire is shaped in the incision made with the chisel, to form the watermark according to the pattern drawn at first.
